

Tetra Alarm & Pow!r Mount App: The Wireless RERC's App Factory Apps

Dexterity Showcase – 2016 M-Enabling Summit
June 14, 2016

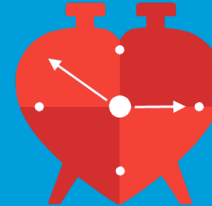

Ben Lippincott, Wireless RERC Project Director, Industry and Consumer Outreach

The Rehabilitation Engineering Research Center for Information and Communications Technology Access (LiveWell RERC) and the Rehabilitation Engineering Research Center for Wireless Technologies (Wireless RERC) is funded by a 5-year grant from the National Institute on Disability, Independent Living and Rehabilitation Research in the U.S. Department of Health and Human Services (grant numbers 90RE5023 and 90RE5007-01-00 respectively). The opinions contained in this presentation are those of the LiveWell RERC and Wireless RERC and do not necessarily reflect those of the U.S. Department of Health and Human Services or NIDILRR.

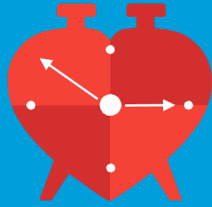

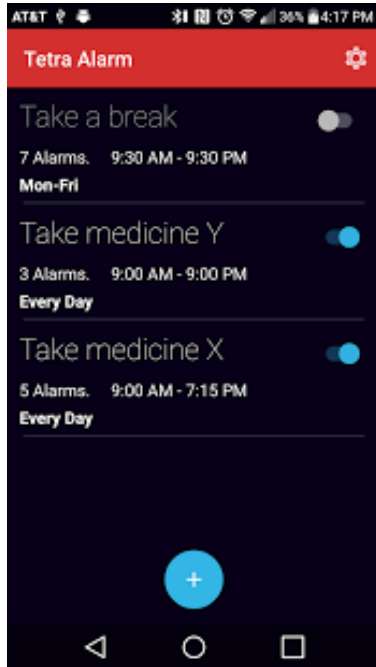

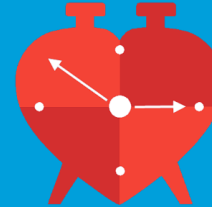

Tetra Alarm

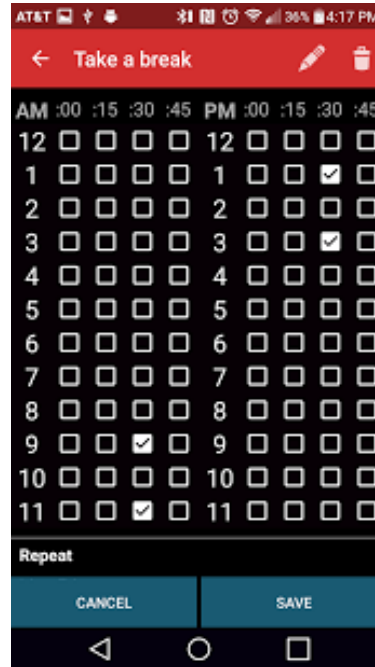

- Easily set reminders for periodic, daily events
- Alarms are easy to set on every quarter hour and are intuitive
- Alarms can be signaled by various methods and can be customized to attract your most keen senses
 - Audible, visual or tactile
- Available on Android
- Android Wear integration
- Can change the length of “snooze” time
- Ability to record your own alarm sounds

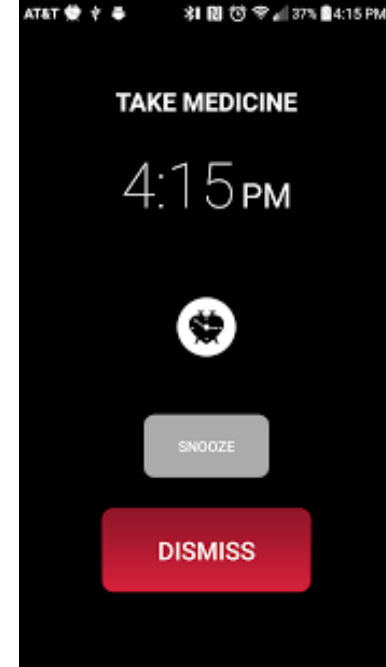

Tetra Alarm

Turn on/off or Add new Alarms from the Home screen

Ability to set alarms at quarter-hour intervals

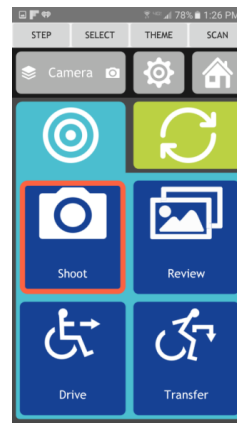

Pow!r Mount App

- Developed by BlueSky Designs
- Allows accessible control from a smartphone or tablet of a powered mounting and positioning system like the Pow!r Mount
- App can be operated by switch, touch, keypad, joystick
- Android and iOS
